

Ziad ELkholy

ASP.NET Core Backend Developer | .NET Engineer

ziadeslam.53200@gmail.com | [+20 115 338 5422](tel:+201153385422) | linkedin.com/in/ziad-elkholy | github.com/ziadeslam-git | [Portfolio](#)

Menoufia, Egypt | Open to Remote

PROFESSIONAL SUMMARY

ASP.NET Core Backend Developer with 1 year of experience building REST APIs, authentication systems, and data-driven web applications using C#, Entity Framework Core, and SQL Server. Proficient in Clean Architecture, Repository Pattern, Unit of Work, and SOLID principles. Led development of a team e-commerce project as Team Leader and delivered full systems independently.enabling end-to-end delivery when needed. Available immediately for remote freelance projects.

CORE COMPETENCIES

ASP.NET Core · REST API Design · Entity Framework Core · Clean Architecture · SQL Server · JWT Authentication · ASP.NET Identity · Repository Pattern · Unit of Work · SOLID Principles · LINQ · Dependency Injection · Stripe Integration · React (Frontend) · AI-Assisted Development

TECHNICAL SKILLS

- **Languages:** C#, SQL, JavaScript, HTML, CSS
- **Backend:** ASP.NET Core, ASP.NET Core MVC, ASP.NET Web API, .NET 9, LINQ
- **Security & Auth:** JWT, ASP.NET Identity, OAuth2, Role-Based Authorization, CORS
- **Data Layer:** Entity Framework Core (Code First), ADO.NET, Dapper, SQL Server, T-SQL, Database Design
- **Architecture:** Clean Architecture, N-Tier, Repository Pattern, Unit of Work, SOLID, Dependency Injection
- **Frontend (Supporting):** React, Vite, Clerk Authentication — capable of generating UI components using AI tools
- **Integrations:** Stripe (Payments), Cloudinary (Media), AutoMapper, Clerk
- **Tools:** Git, GitHub, Visual Studio, SSMS, Postman, Swagger / OpenAPI, Notion
- **Languages (Human):** Arabic (Native), English (Professional)

PROJECTS

AIAsma Admin — Publishing House Sales Management System

Mar 2026 – Present

ASP.NET Core MVC · EF Core (Code First) · SQL Server · N-Tier Architecture

- Engineered a complete sales and inventory management system for a publishing house, built entirely as a solo project from database design to deployment.
- Implemented multi-role access control using ASP.NET Identity, enabling separate admin and author workflows with role-based authorization.
- Built real-time sales analytics dashboard with royalty tracking, publishing contract management, and order fulfillment modules.
- Applied N-Tier Architecture with EF Core Code First migrations for structured, maintainable schema evolution.

Smart Store — E-Commerce Platform [Team Leader]

Jan 2026 – Mar 2026

[ASP.NET Core MVC](#) · [EF Core](#) · [SQL Server](#) · [Stripe](#) · [Cloudinary](#) · [Clean Architecture](#)

- Led a development team as Team Leader, owning the core backend architecture and delivering the majority of the system including admin dashboard, Identity, and customer-facing modules.
- Architected full-stack commerce system using Clean Architecture and Repository + Unit of Work patterns, handling cart, wishlist, checkout, orders, reviews, and discounts.
- Integrated Stripe payment gateway with webhook verification, Cloudinary for media management, and AR/EN localization for bilingual users.

Edu-Stream — Digital Media & Educational Platform

Feb 2026 – Mar 2026

[React](#) · [Vite](#) · [Clerk Authentication](#) · [Vercel](#)

- Designed and developed a frontend educational platform covering digital media literacy and critical thinking skills, built as a commissioned project for a university professor.
- Implemented Clerk-based Google authentication for secure user access without a custom backend server.
- Deployed as a live static application on Vercel, demonstrating ability to deliver complete frontend solutions using modern React stack.

EDUCATION & TRAINING

Bachelor's Degree — Information Systems

2024 – Present

[Higher Institute for Computer & Information Sciences \(HICMIS\)](#) · [Egypt](#)

- GPA: 3.5 / 4.0 (Distinction)
- Relevant Coursework: Database Systems, Software Engineering, Systems Analysis, Business Information Systems, OOP.

Backend .NET & C# Development — Professional Training

2025 – Present

[Erasoft](#) · [Online](#)

- Intensive training: C#, OOP, ASP.NET Core, EF Core, REST API design, JWT security, Clean Architecture, and design patterns.
- Started learning in late 2025; completed core track and transitioned to building real production systems in 2026.
